

Data Cleaning Impact Report

Executive Summary (AI Generated)

This report provides a comprehensive overview of the dataset's integrity, which maintains a high health score of 96.3%. Out of the original 10 records, 9 were successfully cleaned and validated across the six key attributes: ID, Name, Age, Email, JoinDate, and Salary. The primary rectification involved addressing special characters identified in two rows within the "JoinDate" column, ensuring standardized data formatting. Following these targeted corrections, the dataset is now fully optimized for reliable analysis and downstream reporting.

Total Rows: 9

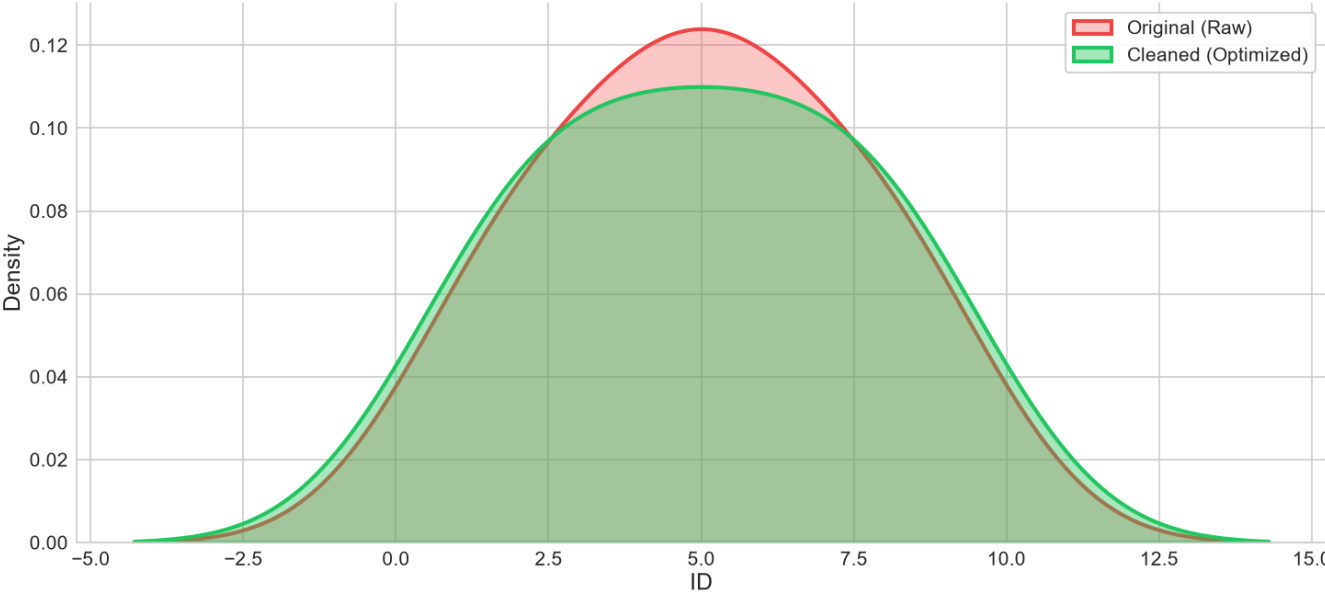

Columns: 6

Analysis: Age

Original Stats	Cleaned Stats
Mean: 38.44 Std: 43.34	Mean: 28.42 Std: 4.13

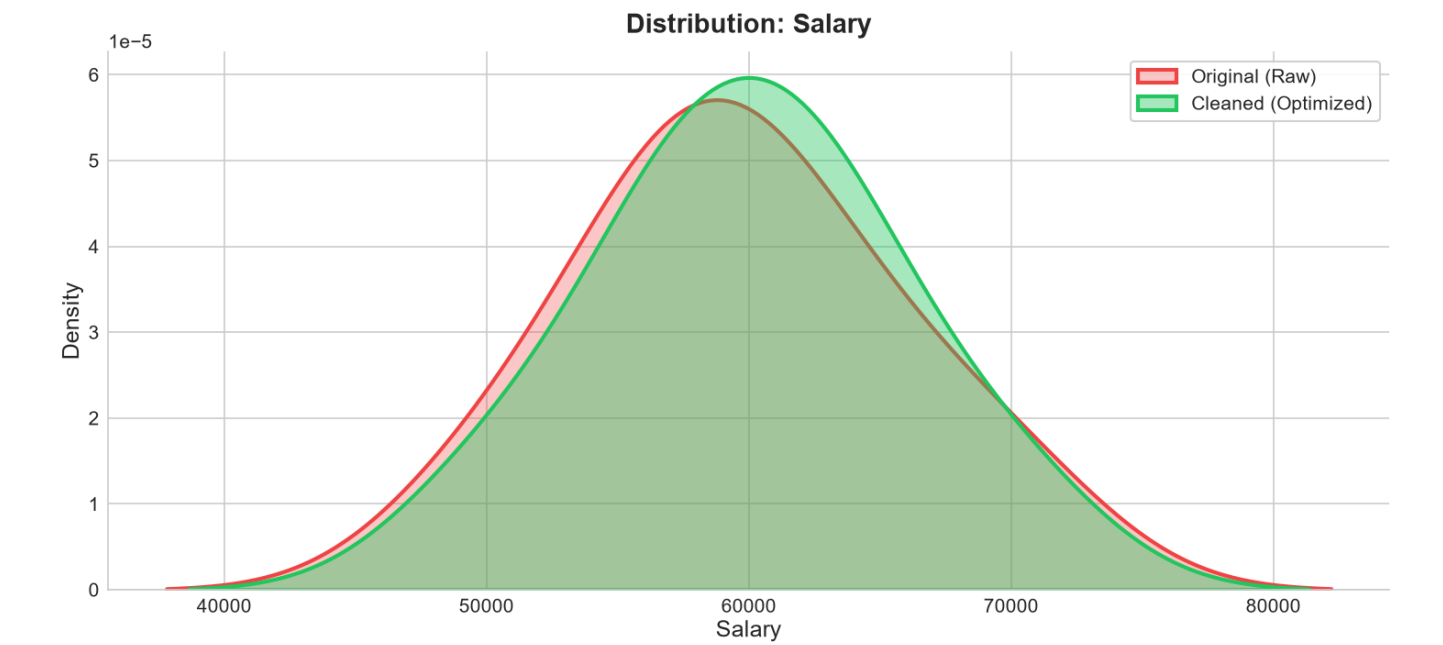

Analysis: ID

Distribution: ID

Original Stats	Cleaned Stats
Mean: 5.00 Std: 2.58	Mean: 5.00 Std: 2.74

Analysis: Salary

Original Stats	Cleaned Stats
Mean: 59625.00 Std: 6162.97	Mean: 60000.00 Std: 5873.67
