SUMMARY

Motivated engineering student with an interest in problem-solving and scalable software systems. Seeking an internship opportunity to apply my coding skills on real world projects and continue learning, growing under the guidance of experienced engineers.

EDUCATION

CVR College Of Engineering, Hyderabad B.Tech (CSE) CGPA: 9.50/10	Sep 2024 - Apr 2028
Narayana Junior College, Nizamabad Intermediate (Class 12th) Marks: 985/1000	June 2022 - June 2024
Sindhu Vidyalayam High School, Banswada Class 10th - SSC CGPA: 10/10	April 2021 - June 2022

SKILLS

Programming Languages: Java, C, HTML5, CSS3

Foundational Technical Skills: Data Structures & Algorithms(DSA), Object-Oriented Programming(OOP)

Developer Tools: Linux(Fundamentals), VS Code, Git, GitHub

Version Control: Git, GitHub

Soft Skills: Collaborative Problem Solving, Willingness to learn

PROJECTS

Student Record Manager ([Live Demo](#) | [Source Code](#)) **Sept 2025**

- **Algorithm Implementation:** Engineered a custom performance-ranking engine utilizing Selection Sort ($O(N^2)$ complexity) and Linear Search to manage student academic data with deterministic ordering.
- **Memory Optimization:** Transitioned from static arrays to dynamic ArrayLists to ensure scalable memory allocation, allowing the system to handle fluctuating dataset sizes without pre-allocation overhead.
- **Architectural Design:** Built a professional modular structure using OOP Principles (Model-Service-UI), separating core DSA logic from presentation layers to enhance code maintainability and feature scalability.
- **Full-Stack Persistence:** Developed a hybrid architecture linking a Java Backend engine to a Premium Web UI, implementing Object Serialization for persistent data storage.

Tech Stack: Java 17, HTML5, CSS3, JavaScript, DSA(Searching/Sorting)

Sorting Visualizer([Live Demo](#) | [Source Code](#)) **Nov 2025**

- **Algorithm Visualization:** Built an interactive platform visualizing Quick Sort, Merge Sort, and Bubble Sort by mapping algorithmic logic to real-time UI transitions.
- **Asynchronous Animations:** Utilized JavaScript async/await and Promises to create smooth, non-blocking animations for array comparisons and swaps.
- **Custom Dataset Control:** Engineered a system for user-defined array inputs, adjustable speeds, and dynamic array scaling to enhance algorithmic testing.
- **Performance & UX Design:** Designed a premium responsive UI with a live stats tracker for comparisons, swaps, and Big O time complexity.

Tech Stack: HTML5, CSS3, JavaScript, Version Control

Achievements

- Achieved **94.3 percentile in JEE Main**, a highly competitive national engineering entrance exam in India.
- Completed **"Data Structures using C"** certification — issued by CVR (Completed: Sep 2025).
